

Wassily Measurement Confirmation for:

Client: _____

While we may have your original leather, it's always wise to confirm measurements.

Measure with a tape measure in three places. In all cases from the outside of the frame to the outside of the frame tube on the opposing side. Measure in inches.

1. Seat. We want a width measurement. At the back of the seat U-frame, before it arcs to the very back rail, measure the width, outside edge of the tube to outside edge.
2. Back. At the top of the back, just below the bend, measure the distance from the outside tube edge to the outside the tube edge on the opposite side.
3. Arm. Same strategy. From the outside edge at the front tube to the outside edge of the back tube.

Please take these measurements and include this with your leather you send us.

Seat: _____

Back: _____

Arm: _____
